Portfolio: https://jaime-romero-hernandez
Web Developer, holder of a Higher Education Degree in Web Application Development (DAW).

During my professional and personal training, I have worked with languages such as JavaScript, TypeScript, PHP, Java, MySQL, CSS3, and frameworks like Next.js, React, and Angular. I enjoy developing attractive, accessible, and responsive interfaces, focused on delivering a good user experience across all types of devices.

I completed an internship at a company where I collaborated on the development and maintenance of real web applications, allowing me to apply what I learned and work in a team with other developers.

I consider myself responsible, eager to learn, continuously improve, and start building my professional path in the web development world.

I am looking for job opportunities where I can contribute my knowledge, continue growing, and face new challenges.

PROFESSIONAL EXPERIENCE
